ABSTRACT

This report presents information on the overall levels of Federal funding to 105 predominantly Black colleges and universities, with particular emphasis on their scientific and engineering activities. The first part of the report covers general funding trends from fiscal year 1973 to fiscal year 1980, and presents information about the number of graduate students and full-time faculty in science and engineering programs at those institutions. The second part consists of individual institutional profiles of Federal funding at each of the institutions, along with information about their scientific personnel by field, degree, and sex. NATIONAL SCIENCE FOUNDATION

ACKNOWLEDGEMENTS

This report was prepared in the Office of Planning and Resources Management by Richard M. Berry and Melvin Thompson. Penny D. Foster of the Division of Science Resources Studies coordinated the production of the Institutional Profiles shown in the appendix to this report.

FOREWORD

This report presents information on the overall levels of Federal funding to 105 predominantly Black colleges and universities, with particular emphasis on their scientific and engineering activities. It was prepared as one aspect of the National Science Foundation's response to the President's Executive Order of September 15, 1981, which made clear the Administration's commitment to strengthening the capabilities of historically Black colleges and universities. The first part of the report covers general funding trends from fiscal year 1973 to fiscal year 1980, and presents information about the number of graduate students and full-time faculty in science and engineering programs at those institutions. The second part of the report consists of individual profiles of Federal funding at each of the institutions, along with information about their scientific and engineering personnel by field, degree and sex.

In general, science and engineering students receive better instruction and learn more if they and their teachers are actively pursuing new, fundamental knowledge through active research programs. Yet we are faced with some disturbing statistics about the low level of scientific resources and activities at most Black colleges and universities. Although more than 50 percent of the Nation's Black engineers and 85 percent of the Black doctors took undergraduate degrees at the 105 colleges and universities, these schools generally have not had the benefit of adequate levels of funding from both the public and private sectors to build up their research capabilities.

All colleges and universities, the source of the Nation's scientists and engineers, perform over one-half of the Nation's basic research. Yet, with a few exceptions, Black colleges and universities as a whole have not yet received adequate support to enable them to compete successfully for research grants and contracts from public and private sources. Only one percent of all Federally sponsored research was performed at Black colleges and universities in 1980.

The National Science Foundation is working to increase the participation of these and other minority institutions in all of the Foundation's programs, because we are convinced that the Nation's scientific and technological enterprise will be strengthened when the talents and resources at minority institutions are more effectively developed and used. The Foundation will continue to offer competitive programs designed to strengthen the scientific research capacity of Black colleges and universities, and to help advance the interests and talents of their faculties and students. I hope this report, by indicating some of the scientific and engineering opportunities available at Black colleges and universities, will be of assistance in planning ways to help increase their research capabilities. The benefits would be twofold. The scientific competence of faculties and students would be increased and they, in turn, would contribute more to the Nation's scientific and technological developments.

John B. Slaughter
Director

INTRODUCTION

Black colleges and universities are a valuable resource in contributing to the quality of educational opportunities for our Nation's youth and the conduct of research. Because of the historical contributions of Black colleges and their importance in our society this report is organized to respond to the following questions:

(1) What has been the pattern and level of Federal funding particularly for scientific and engineering activities at Black colleges and universities?

(2) What are the levels of participation by graduate students and scientific and engineering personnel employed at Black colleges and universities?

(3) What are the activities of the National Science Foundation that assist in advancing science and engineering activities at Black colleges and universities?

The body of the report and appendices containing the institutional profiles respond to questions 1 and 2. The focus of this introduction is to respond to the third question.

Since its establishment in 1950 the National Science Foundation has been authorized and directed to ". . . initiate and support basic scientific research and programs to strengthen scientific research potential and science education programs at all levels." To accomplish this mission and in response to the Science and Technology Act of 1981, the Foundation supports activities that strengthen the science and engineering potential at Black colleges and universities. The Foundation encourages the participation of Black colleges and universities in programs described in the National Science Foundation's *Guide to Programs: Fiscal Year 1982*.

The Foundation in December 1981 submitted a report to Congress containing, among a broad set of initiatives, several strategies designed to enhance opportunities for students and faculties at Black colleges and universities. The report contains recommendations of the National Science Foundation to promote the full participation of minorities and women. Among the proposed initiatives was the establishment of a newer Office of Equal Opportunity with responsibility for coordinating the planning and assessment of women and minority-related science and engineering activities. Staff orientation and technical assistance to the faculties at Black colleges and universities are also identified as activities in the report.

In addition to ensuring that key personnel at Black colleges and universities receive timely program announcements and participate in peer review and advisory panels, the National Science Foundation, in conjunction with the activities of its research programs, has created a Coordinated Agency-Wide Research Activities (CARA) subactivity. To ensure efficient management and appropriate visibility, some programs that span several NSF research efforts, such as programs focused on enhancing the research contributions of minorities and women, are addressed centrally under the CARA subactivity. Each program in CARA represents an area of the science and engineering enterprise where relatively small amounts of support can have a significant national impact. The overall objectives of CARA will be pursued through, but not limited to, the following programs which focus on issues related to the Nations historically Black colleges and universities:

1. ***Research Improvement In Minority Institutions*** provides funding for improving research environments at participating institutions. The Program supports faculty research and the acquisition of research equipment. It also supports cooperative research projects among academic institutions and between academic institutions and industry. This program responds to Presidential Executive Order 12320.
2. ***Minority Research Initiation*** provides increased access to scientific research opportunities by ethnic minority scientists and engineers who are significantly underrepresented in the scientific and engineering career pool. This program provides research support for minority faculty at any college or university who are not presently receiving or have not previously received, Federal research support.
3. ***Visiting Professorships for Women*** which provides for increased participation of women scientists and engineers as visiting professors in academic institutions. In addition to expanding research and teaching opportunities, these professors are available to advise and counsel other women in pursuit of careers in science and engineering.
4. ***Experimental Program to Stimulate Competitive Research*** provides incentives for academic scientists and industrial leaders within certain states to execute research plans designed to respond to scientific needs and circumstances identified locally.

The primary focus of the Foundation's activities is the performance of research carried out by the Nation's scientists and engineers, primarily in colleges and universities. The Foundation is working to encourage other sectors of society—Federal agencies, state and local governments, professional societies, private organizations and foundations and industry—to assist in enhancing opportunities that result in increased science and engineering research and related educational activities at Black colleges and universities.

The Foundation, through all its research and educational programs, is commited to assisting the President in realizing the goals set forth in the September 15, 1981 Executive Order that calls for increased support for our Nation's Black colleges and universities. The data in this report are organized to identify opportunities that realize the goals of strengthening science and engineering activities at Black colleges and universities.

TECHNICAL NOTES

General

- This report and the Institutional Profiles shown in the Appendix present data on 105 predominantly black institutions of higher education in the United States. These data were collected through four academic science surveys conducted by the Universities and Nonprofit Institutions Studies Group (UNISG) of the National Science Foundation's Division of Science Resources Studies. The four surveys are:
    1. Survey of Scientific and Engineering Expenditures at Universities and Colleges;
    2. Survey of Federal Support to Universities, Colleges, and Selected Nonprofit Institutions;
    3. Survey of Graduate Science Students and Postdoctorates; and
    4. Survey of Scientific and Engineering Personnel Employed at Universities and Colleges.
- Data on expenditures, personnel, and graduate students were collected from the institutions themselves; data on Federal obligations were collected directly from the major funding agencies.
- As noted below, institutional coverage varies among the four surveys. Each Institutional Profile contains data from those surveys in which the institution was included.

R&D Expenditures

- In all but one year, data on R&D expenditures were collected from institutions offering a doctorate or master's degree in the sciences and engineering. In FY 1978, a short form was mailed to doctorate-granting institutions only and data on capital expenditures for facilities and research equipment were not collected.
- "Expenditures" differ from "obligations" in that funds obligated by a Federal agency during one fiscal year may be expended by the recipient institution either partially or entirely during one or more subsequent years.

Employment of Scientists and Engineers (S/E)

- Except as noted below, data on S/E personnel were collected from all institutions of higher education, including 2-year institutions, that offer degree-credit courses in the sciences or engineering.
- In January 1979, a short form was mailed to doctorate-granting institutions only. Data on scientists and engineers by highest earned degree, full and part-time employment status, and sex were not collected in 1979.

Federal Support

- Obligation data reflect both science and nonscience obligations of fourteen Federal agencies in the form of direct support to institutions. Tuition support programs such as the Department of Education's "Pell Grants" constitute nearly all of the nonscience data in this survey.
- Excluded from the "obligation" concept are loans to individuals, such as OE's Federal guaranteed student loan programs, and Federal employee training and development activities, as well as funds allocated to State agencies, even though the final recipient of such funds is known to be an academic institution.

Graduate Science Students and Postdoctorates

- Comparable data for both doctorate- and master's-granting institutions were available for the first time beginning in fall 1979. Previously, only doctorate-granting institutions were surveyed.
- In fall 1978, a short form was mailed to these doctorate-granting institutions. Data on types of major support and postdoctorates were not collected in 1978.

Resources Supporting Scientific Activities at Predominantly Black Colleges and Universities

Trends in Federal funding to 105 colleges and universities with predominantly Black enrollment that are the focus of this report differed significantly from funding trends at higher education institutions in general. Recently, Federal support to institutions of higher education increased mainly in terms of academic science and R&D activities. Predominantly Black colleges and universities, on the other hand, continued to rely on Federal support primarily in the form of student aid.

Because of heavy reliance on student aid programs, recent Federal funding patterns at predominantly black colleges and universities reflect greater volatility than these patterns at higher education institutions in general. Emphasis has been shifting away from direct aid to institutions, such as "Pell Grants," to aid programs for students such as the Guaranteed Student Loan Progam which, in general, are being cut because of overwhelming national priorities such as controlling inflation and reducing Federal budgetary deficits. As a result, total Federal obligations to predominantly Black institutions declined by 5 percent from FY 1978 to 1980, from $483 million to $461 million (chart 1).

Of total Federal support to all higher education institutions, three-fifths was for academic science, including R&D activities, facilities and equipment, fellowships and traineeships, and general support. The comparable proportion was one-fifth at predominantly Black institutions (charts 1 and 2). Federal funds for research and development accounted for one-half of the total at all institutions, compared with one-sixth at the Black institutions. During 1973-80, while Federal support for the conduct of R&D activities, which is a component of "academic science," was increasing relative to total Federal funding at all institutions (from 48.7 percent in 1973 to 49.9 percent in 1980), their relative share slightly declined at Black colleges and universities (from 8.7 percent in 1973 to 8.3 percent in 1980).

Federal obligations received by predominantly Black colleges and universities peaked at $483 million in FY 1978 (table 1). The percent of Federal support to all institutions that the 105 Black institutions received peaked in FY's 1974 and 1977. In 1980, they received 5.3 percent of total Federal obligations, representing a decline from the smallest relative amount previously received of 5.8 percent in 1973.

Table 1. Federal Obligations to Institutions of Higher Education and Predominantly Black Colleges and Universities: FY 1973-80

Fiscal Year	Total Obligations (Dollars in Thousands)		Black Colleges and Universities as Percent of Total
	All Institutions	Black Colleges and Universities	
1973	3,839,102	223,474	5.8
1974	4,480,372	308,944	6.9
1975	4,547,191	280,851	6.2
1976	5,402,764	365,141	6.8
1977	6,489,735	450,550	6.9
1978	7,471,843	482,961	6.5
1979	7,603,888	(a)	(a)
1980	8,319,815	437,166	5.3

[a] Data are not available for FY 1979 because of reporting errors by the Department of Education.

SOURCE: National Science Foundation

Throughout the 1973-80 period, Federal support of R&D activities at predominantly Black institutions comprised only one percent of the total to all institutions (table 2). While Federal R&D obligations grew by 87 percent during 1973-80 at the Black institutions, they more than doubled (122 percent) at all institutions.

Only three of the Black institutions awarded Ph.D. degrees in science and engineering—Howard University, Meharry Medical College, and Atlanta University. Twenty others awarded Master's degrees in science and engineering. Nine of the ten leading recipients of total Federal support had graduate programs in the sciences and engineering, South Carolina State College being the only Bachelor's granting institution (table 3). Altogether, the top 10 recipients accounted for almost three-fifths of total Federal support to the 105 predominantly Black institutions.

Howard University was dominant among leading recipients of Federal support in FY 1980 with $166 million, or 36 percent of the total, but the major part of those funds was the Department of Education's appropriations for general operating expenses. The heavy reliance of Howard University on Federal funding for operating expenses is reflected in the fact that only $7.1 million, or 4 percent of the $166 million received in FY 1980, was for R&D activities (table 4). Although R&D funds represented relatively small parts of Howard University's total, they were about 2½ times more than the next leading recipient of Federal R&D support—Tuskegee Institute with $2.6 million. The 10 top recipients of Federal R&D support accounted for $22.2 million, or 61 percent of the total amount of $36.5 million at all of the predominantly Black institutions.

Table 2. Federal R&D Obligations to Institutions of Higher Education and Predominantly Black Colleges and Universities: FY 1973-80

Fiscal Year	R&D Obligations (Dollars in Thousands)		Black Colleges and Universities as Percent of Total
	All Institutions	Black Colleges and Universities	
1973	1,870,690	19,532	1.0
1974	2,085,204	21,736	1.0
1975	2,238,744	24,041	1.1
1976	2,423,072	25,417	1.1
1977	2,788,517	26,635	1.0
1978	3,364,012	28,554	.9
1979	3,846,992	32,638	.8
1980	4,155,366	36,466	.9

10. Virginia State University	1,242
Total	$22,187
Leading 10 as percent of total	60.8%

SOURCE: National Science Foundation

Because of dependence on student aid, as well as of the operating expenses for Howard University mentioned above, Black colleges and universities received almost one-half of total Federal support from a single agency, the Department of Education (chart 3). Nearly all of the Department of Education support was in the "nonscience" category. The Department of Health and Human Sciences accounted for $172 million, or 37 percent of the FY 1980 total. The "other agencies" obligated $70.8 million, or about one-sixth of the total, most of which was for science activities, including research and development. Among these "other agencies," the Department of Agriculture funded $30 million in FY 1980 and the National Science Foundation $5.5 million. All of the major Federal agencies funding the Black institutions, except the Department of Education and the National Science Foundation, showed increases in FY 1980 over the prior year. The downturn in Education funds, as previously indicated, resulted from shifts in student aid programs from direct institutional support to student loans and the NSF downturn resulted from the transfer of its Minority Institutions Science Improvement Program (MISIP) to the Department of Education in FY 1980.

Table 5. Graduate Science Students in Predominantly Black Colleges and Universities by Field*, 1980

	All Institutions	*Black Colleges and Universities*	*Black Colleges and Universities as Percent of Total*
Total Science Students	383,210	3,368	.9
Engineering	77,174	264	.3
Physical Sciences	27,063	241	.9
Life Sciences	102,701	991	1.0
Social Sciences	93,175	1,237	1.3
Other Sciences	83,097	635	.8

*These data include full- and part-time graduate students enrolled in science and engineering graduate schools for master's and doctoral degrees.

SOURCE: National Science Foundation

The scientists and engineers employed at Black institutions and the graduate science students they enroll are relatively small in numbers. The 3,368 graduate science students enrolled in predominantly Black institutions in 1980 represented less than one percent of the United States total (table 5). The 5,310 scientists and engineers on their faculties accounted for only 2 percent of the total (table 6). These relatively small numbers of scientific resources help explain why R&D activities conducted at the Black institutions are also relatively small.

Two doctoral institutions—Howard University (1,016 graduate science students) and Atlanta University (587 graduate science students)—had about one-half of the total. Full-time employment of scientists and engineers was not as highly concentrated, but 10 Black institutions accounted for almost one-half of the total, as follows: Howard University (979), Tennessee State (224), Florida A&M (202), Meharry Medical College (192), Southern A&M, All Campuses (171), University of the District of Columbia (150), North Carolina A&T (124), Jackson State University (112), Texas Southern University (108), and Alabama A&M (94).

Engineering resources in the Black institutions were especially small in number. The 264 engineering graduate students comprised only 0.3 percent of the Nation's total and the 278 full-time engineers accounted for only 1.0 per-

Table 6. Full-Time Scientists and Engineers Employed at Predominantly Black Colleges and Universities by Field, January 1981

	All Institutions	*Black Colleges and Universities*	*Black Colleges and Universities as Percent of Total*
Total Scientists and Engineers	258,849	5,310	2.1
Engineers	26,992	278	1.0
Physical Scientists	28,173	795	2.8
Life Scientists	110,059	1,902	1.7
Social Scientists	41,163	1,090	2.6
Other Scientists	52,462	1,245	2.4

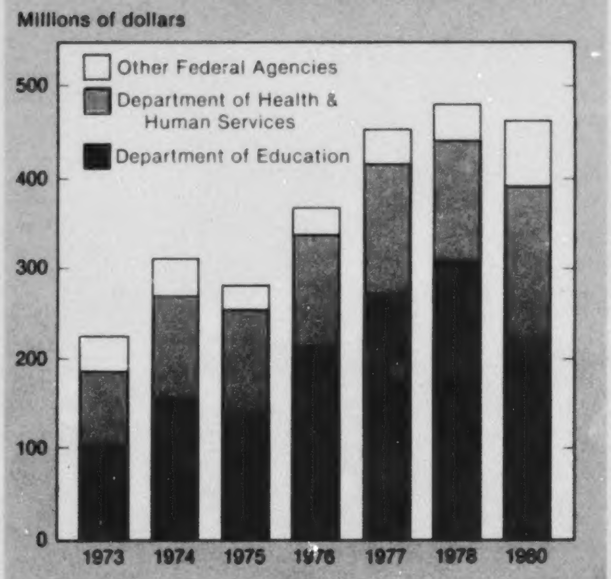
Chart 3. Federal Obligations to Predominantly Black Colleges and Universities by Source of Support*



*Data are not available for FY 1979 because of reporting errors by the Department of Education.

SOURCE: National Science Foundation

cent of those employed by all institutions. Only four of the Black institutions had graduate students majoring in engineering, as follows: Howard University (120), North Carolina A&T (71), Tennessee State (44), and Tuskegee Institute (15). Three of these institutions—Howard University, North Carolina A&T, and Tennessee State—employed two-fifths of all full-time engineers in all of the predominantly Black institutions.

Graduate students enrolled in the social sciences were the largest single group in the Black colleges and universities. The 1,237 graduate students enrolled for advanced degrees in the social sciences accounted for more than one-third of the Black institution total, but represented only 1.3 percent of the United States total. Life scientists (mostly biologists and medical scientists) employed full-time on the faculties of the Black institutions numbered 1,902 and social scientists numbered 1,090. Among the institutions, Atlanta University with 389 graduate students in the social sciences was the leader, followed by Howard University (331), and Jackson State University (110). Together, these three institutions accounted for more than two-thirds of all graduate students enrolled in the social sciences at the 105 institutions.

In terms of the distribution of Federal R&D funding, the most notable disparity between the predominantly Black institutions and all United States institutions was in the engineering disciplines. Federal R&D obligations in engineering to all institutions accounted for 11 percent of the 1973 total, compared with 15 percent in 1980 (chart 4). In the Black institutions engineering showed a downward trend, comprising 8 percent of their Federal R&D obligations in 1973 and only 6 percent in 1980. R&D activities in the life sciences dominated in both sets of instituions and was growing as percent of the total. Life science research was 50 percent of total Federal support in all United States institutions of higher education in 1973 and 52 percent in 1980; the same comparative data for the Black colleges and universities were 53 percent in 1973 and 58 percent in 1980.

Federal support of social science research made up a much larger part of R&D activities in Black colleges and universities than institutions of higher education generally. More than one-fifth of total Federal R&D funds in the Black institutions in 1980 was for social science research, compared with only 5 percent in all institutions.

Except for engineering, Federal R&D expenditures comprised a larger share of the total from all sources (industry, state and local governments, etc.) in the Black colleges and universities than in all institutions (chart 5). Also, except for engineering, predominantly Black institutions relied more heavily on Federal sources to support their R&D activities throughout the period 1973-80. Nearly nine-tenths of funding for R&D activities in the life sciences was sponsored by Federal agencies in both 1973 and 1980 in the Black institutions, compared with two-thirds in all institutions. The relative amount of Federal R&D support in the physical sciences remained steady in 1973 and 1980 at about four-fifths of the total in all institutions, but that reliance increased at Black institutions, until by 1980, nearly nine-tenths of the total was financed by Federal agencies. In the social sciences, Federal funds in 1980 accounted for 70 percent of the total in Black colleges and universities and 53 percent at all institutions. Engineering, as noted above, was the exception with 69 percent being financed by Federal agencies at all institutions of higher education and 64 percent at the Black institutions. By comparison, in FY 1973, the picture was reversed, with 87 percent of R&D activities in engineering at the Black institutions being financed with Federal funds, compared with 72 percent in all institutions.

INSTITUTIONAL PROFILE

001002

ALABAMA AGRICULTURAL AND MECHANICAL UNIVERSITY

Public Master's-Granting

CARNEGIE COUNCIL CATEGORY: 2.1

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Scientific and Engineering Expenditures at Universities and Colleges
NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF-NIH Survey of Graduate Science Students and Postdoctorates
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:

- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

010554

ALABAMA LUTHERAN ACADEMY AND COLLEGE

Private No Science Degree

CARNEGIE COUNCIL CATEGORY: 4.1

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions

An alphabetic suffix may appear for certain individual data variables:

- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

001059

LAWSON STATE COMMUNITY COLLEGE

Public Two-Year Program

CARNEGIE COUNCIL CATEGORY: 4.1

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:

- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

001025

LOMAX-HANNON JUNIOR COLLEGE

Private Two-Year Program

CARNEGIE COUNCIL CATEGORY: 4.1

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions

An alphabetic suffix may appear for certain individual data variables:

- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

001033

OAKWOOD COLLEGE

Private Bachelor's-Granting

CARNEGIE COUNCIL CATEGORY: 3.2

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:
- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

001030

S D BISHOP STATE JUNIOR COLLEGE

Public Two-Year Program

CARNEGIE COUNCIL CATEGORY: 4.1

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:

- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

001044

STILLMAN COLLEGE

Private Bachelor's-Granting

CARNEGIE COUNCIL CATEGORY: 3.2

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:
- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

001050

TUSKEGEE INSTITUTE

Private Master's-Granting

CARNEGIE COUNCIL CATEGORY: 2.1

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Scientific and Engineering Expenditures at Universities and Colleges
NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF-NIH Survey of Graduate Science Students and Postdoctorates
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:

- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

001087

ARKANSAS BAPTIST COLLEGE

Private Bachelor's-Granting

CARNEGIE COUNCIL CATEGORY: 3.2

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions

An alphabetic suffix may appear for certain individual data variables:

- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

001105

SHORTER COLLEGE

Private Two-Year Program

CARNEGIE COUNCIL CATEGORY: 4.1

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions

An alphabetic suffix may appear for certain individual data variables:
- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

001188

COMPTON COMMUNITY COLLEGE

Public Two-Year Program

CARNEGIE COUNCIL CATEGORY: 4.1

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:
- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

001428

DELAWARE STATE COLLEGE

Public Bachelor's-Granting

CARNEGIE COUNCIL CATEGORY: 2.2

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:
- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

029100

UNIVERSITY OF THE DISTRICT OF COLUMBIA

Public Master's-Granting

CARNEGIE COUNCIL CATEGORY: 2.1

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Scientific and Engineering Expenditures at Universities and Colleges
NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF-NIH Survey of Graduate Science Students and Postdoctorates
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:

- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

006957

U OF D C VAN NESS CAMPUS

Public Private

CARNEGIE COUNCIL CATEGORY: 9.9

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:
- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

007015

U OF D C MOUNT VERNON SQUARE CAMPUS

S Public Private

CARNEGIE COUNCIL CATEGORY: 9.9

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions

An alphabetic suffix may appear for certain individual data variables:
- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

001448

HOWARD UNIVERSITY

Private Doctorate-Granting

CARNEGIE COUNCIL CATEGORY: 1.2

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Scientific and Engineering Expenditures at Universities and Colleges
NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF-NIH Survey of Graduate Science Students and Postdoctorates
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:

- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

001467

BETHUNE COOKMAN COLLEGE

Private Bachelor's-Granting

CARNEGIE COUNCIL CATEGORY: 2.2

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:
- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

001480

FLORIDA AGRICULTURAL AND MECHANICAL UNIVERSITY

Public Master's-Granting

CARNEGIE COUNCIL CATEGORY: 2.1

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Scientific and Engineering Expenditures at Universities and Colleges
NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF-NIH Survey of Graduate Science Students and Postdoctorates
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:

- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

001486

FLORIDA MEMORIAL COLLEGE

Private Bachelor's-Granting

CARNEGIE COUNCIL CATEGORY: 3.2

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:
- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

012165

ATLANTA JUNIOR COLLEGE

Public Two-Year Program

CARNEGIE COUNCIL CATEGORY: 4.1

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions

An alphabetic suffix may appear for certain individual data variables:

- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

Prepared for:

National Science Foundation
Division of Science Resources Studies
Universities and Nonprofit Institutions Studies Group

INSTITUTIONAL PROFILE

001559

CLARK COLLEGE

Private Bachelor's-Granting

CARNEGIE COUNCIL CATEGORY: 2.2

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:
- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

001566

FORT VALLEY STATE COLLEGE

Public Bachelor's-Granting

CARNEGIE COUNCIL CATEGORY: 2.2

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:
- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

MOREHOUSE COLLEGE

Private Bachelor's-Granting

CARNEGIE COUNCIL CATEGORY: 3.2

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:

- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

001583

MORRIS BROWN COLLEGE

Private Bachelor's-Granting

CARNEGIE COUNCIL CATEGORY: 2.2

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:

- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

SAVANNAH STATE COLLEGE

Public Bachelor's-Granting

CARNEGIE COUNCIL CATEGORY: 2.1

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF-NIH Survey of Graduate Science Students and Postdoctorates
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:
- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

001594

SPELMAN COLLEGE

Private Bachelor's-Granting

CARNEGIE COUNCIL CATEGORY: 3.2

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:

- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

001694

CHICAGO STATE UNIVERSITY

Public Master's-Granting

CARNEGIE COUNCIL CATEGORY: 2.1

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Scientific and Engineering Expenditures at Universities and Colleges
NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF-NIH Survey of Graduate Science Students and Postdoctorates
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:

- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

001968

KENTUCKY STATE UNIVERSITY

Public Bachelor's-Granting

CARNEGIE COUNCIL CATEGORY: 2.2

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Scientific and Engineering Expenditures at Universities and Colleges
NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:
- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

002004

DILLARD UNIVERSITY

Private Bachelor's-Granting

CARNEGIE COUNCIL CATEGORY: 3.2

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Scientific and Engineering Expenditures at Universities and Colleges
NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:

- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

002006

GRAMBLING STATE UNIVERSITY

Public Master's-Granting

CARNEGIE COUNCIL CATEGORY: 2.1

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Scientific and Engineering Expenditures at Universities and Colleges
NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF-NIH Survey of Graduate Science Students and Postdoctorates
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:
- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

002025

SOUTHERN UNIVERSITY & A&M COL. ALL CAMPUSES

Public Master's-Granting

CARNEGIE COUNCIL CATEGORY: 2.1

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Scientific and Engineering Expenditures at Universities and Colleges
NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF-NIH Survey of Graduate Science Students and Postdoctorates
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:

- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

002032

XAVIER UNIVERSITY OF LOUISIANA

Private Bachelor's-Granting

CARNEGIE COUNCIL CATEGORY: 2.2

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:

- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

002062

BOWIE STATE COLLEGE

Public — Bachelor's-Granting

CARNEGIE COUNCIL CATEGORY: 2.2

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:

- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

002068

COPPIN STATE COLLEGE

Public Master's-Granting

CARNEGIE COUNCIL CATEGORY: 2.2

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF-NIH Survey of Graduate Science Students and Postdoctorates
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:
- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

002083

MORGAN STATE UNIVERSITY

Public Master's-Granting

CARNEGIE COUNCIL CATEGORY: 2.1

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Scientific and Engineering Expenditures at Universities and Colleges
NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF-NIH Survey of Graduate Science Students and Postdoctorates
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:

- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

002106

UNIVERSITY OF MARYLAND, EASTERN SHORE

Public Bachelor's-Granting

CARNEGIE COUNCIL CATEGORY: 3.2

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Scientific and Engineering Expenditures at Universities and Colleges
NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:

- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

002271

HIGHLAND PARK COMMUNITY COLLEGE

Public Two-Year Program

CARNEGIE COUNCIL CATEGORY: 4.1

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:

- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

002289

SHAW COLLEGE AT DETROIT

Private Bachelor's-Granting

CARNEGIE COUNCIL CATEGORY: 3.2

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:

- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

WAYNE COUNTY COMMUNITY COLLEGE

Public Two-Year Program

CARNEGIE COUNCIL CATEGORY: 4.1

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:
- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

002396

ALCORN STATE UNIVERSITY

Public Bachelor's-Granting

CARNEGIE COUNCIL CATEGORY: 2.1

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Scientific and Engineering Expenditures at Universities and Colleges
NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:

- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

002401

COAHOMA JUNIOR COLLEGE

Public Two-Year Program

CARNEGIE COUNCIL CATEGORY: 4.1

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:
- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

002410

JACKSON STATE UNIVERSITY

Public Master's-Granting

CARNEGIE COUNCIL CATEGORY: 2.1

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Scientific and Engineering Expenditures at Universities and Colleges
NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF-NIH Survey of Graduate Science Students and Postdoctorates
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:

- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

002412

MARY HOLMES COLLEGE

Private Two-Year Program

CARNEGIE COUNCIL CATEGORY: 4.1

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:

- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

002424

MISSISSIPPI VALLEY STATE UNIVERSITY

Public Bachelor's-Granting

CARNEGIE COUNCIL CATEGORY: 2.1

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Scientific and Engineering Expenditures at Universities and Colleges
NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:

- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

002425

NATCHEZ JUNIOR COLLEGE

Private Two-Year Program

CARNEGIE COUNCIL CATEGORY: 4.1

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions

An alphabetic suffix may appear for certain individual data variables:
- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

002433

RUST COLLEGE

Private Bachelor's-Granting

CARNEGIE COUNCIL CATEGORY: 3.2

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:

- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

002445

UTICA JUNIOR COLLEGE

Public Two-Year Program

CARNEGIE COUNCIL CATEGORY: 4.1

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:

- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

002479

LINCOLN UNIVERSITY

Public Bachelor's-Granting

CARNEGIE COUNCIL CATEGORY: 2.1

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:
- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

002909

BARBER-SCOTIA COLLEGE

Private Bachelor's-Granting

CARNEGIE COUNCIL CATEGORY: 3.2

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:

- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

002926

ELIZABETH CITY STATE UNIVERSITY

Public Bachelor's-Granting

CARNEGIE COUNCIL CATEGORY: 2.2

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:

- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

JOHNSON C SMITH UNIVERSITY

Private　　Bachelor's-Granting

CARNEGIE COUNCIL CATEGORY: 2.2

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:
- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

002905

NORTH CAROLINA AGRICULTURAL & TECH STATE UNIV

Public Master's-Granting

CARNEGIE COUNCIL CATEGORY: 2.1

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Scientific and Engineering Expenditures at Universities and Colleges
NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF-NIH Survey of Graduate Science Students and Postdoctorates
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:

- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

002950

NORTH CAROLINA CENTRAL UNIVERSITY

Public Master's-Granting

CARNEGIE COUNCIL CATEGORY: 2.1

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Scientific and Engineering Expenditures at Universities and Colleges
NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF-NIH Survey of Graduate Science Students and Postdoctorates
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:

- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

002962

SHAW UNIVERSITY

Private Bachelor's-Granting

CARNEGIE COUNCIL CATEGORY: 3.2

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:

- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

002968

ST AUGUSTINE'S COLLEGE

Private Bachelor's-Granting

CARNEGIE COUNCIL CATEGORY: 2.2

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:

- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

002986

WINSTON-SALEM STATE UNIVERSITY

Public Bachelor's-Granting

CARNEGIE COUNCIL CATEGORY: 2.2

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:

- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

003141

WILBERFORCE UNIVERSITY

Private Bachelor's-Granting

CARNEGIE COUNCIL CATEGORY: 3.2

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:

- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

003157

LANGSTON UNIVERSITY

Public Bachelor's-Granting

CARNEGIE COUNCIL CATEGORY: 2.2

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:
- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF-NIH Survey of Graduate Science Students and Postdoctorates
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:
- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

003290

LINCOLN UNIVERSITY

Public Bachelor's-Granting

CARNEGIE COUNCIL CATEGORY: 3.2

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Scientific and Engineering Expenditures at Universities and Colleges
NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:

- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

003417

ALLEN UNIVERSITY

Private   Bachelor's-Granting

CARNEGIE COUNCIL CATEGORY: 3.2

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:
- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

003420

BENEDICT COLLEGE

Private Bachelor's-Granting

CARNEGIE COUNCIL CATEGORY: 2.2

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:
- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

003424

CLAFLIN COLLEGE

Private Bachelor's-Granting

CARNEGIE COUNCIL CATEGORY: 3.2

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:
- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

003433

FRIENDSHIP COLLEGE

Private Two-Year Program

CARNEGIE COUNCIL CATEGORY: 4.1

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:

- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

003446

SOUTH CAROLINA STATE COLLEGE

Public Bachelor's-Granting

CARNEGIE COUNCIL CATEGORY: 2.1

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Scientific and Engineering Expenditures at Universities and Colleges
NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:

- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

003455

VOORHEES COLLEGE

Private Bachelor's-Granting

CARNEGIE COUNCIL CATEGORY: 3.2

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:

- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Scientific and Engineering Expenditures at Universities and Colleges
NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF-NIH Survey of Graduate Science Students and Postdoctorates
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

* An alphabetic suffix may appear for certain individual data variables:

- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

003497

KNOXVILLE COLLEGE

Private Bachelor's-Granting

CARNEGIE COUNCIL CATEGORY: 3.2

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:
- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

003501

LE MOYNE-OWEN COLLEGE

Private Bachelor's-Granting

CARNEGIE COUNCIL CATEGORY. 3.2

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:

- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

MEHARRY MEDICAL COLLEGE

Private Doctorate-Granting

CARNEGIE COUNCIL CATEGORY: 5.2

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Scientific and Engineering Expenditures at Universities and Colleges
NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF-NIH Survey of Graduate Science Students and Postdoctorates
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:

- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

003512

MORRISTOWN COLLEGE

Private	Two-Year Program

CARNEGIE COUNCIL CATEGORY: 4.1

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:

- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

003522

TENNESSEE STATE UNIVERSITY

Public Master's-Granting

CARNEGIE COUNCIL CATEGORY: 2.1

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Scientific and Engineering Expenditures at Universities and Colleges
NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF-NIH Survey of Graduate Science Students and Postdoctorates
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:

- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

003548

BISHOP COLLEGE

Private Bachelor's-Granting

CARNEGIE COUNCIL CATEGORY: 2.2

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:

- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

003577

HUSTON-TILLOTSON COLLEGE

Private Bachelor's-Granting

CARNEGIE COUNCIL CATEGORY: 3.2

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:

- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

003602

PAUL QUINN COLLEGE

Private Bachelor's-Granting

CARNEGIE COUNCIL CATEGORY: 3.2

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:

- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

PRAIRIE VIEW AGRICULTURE AND MECHANICAL UNIV

Public Master's-Granting

CARNEGIE COUNCIL CATEGORY: 2.1

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Scientific and Engineering Expenditures at Universities and Colleges
NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF-NIH Survey of Graduate Science Students and Postdoctorates
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:

- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

003618

SOUTHWESTERN CHRISTIAN COLLEGE

Private Two-Year Program

CARNEGIE COUNCIL CATEGORY: 4.1

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:

- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

003642

TEXAS SOUTHERN UNIVERSITY

Public Master's-Granting

CARNEGIE COUNCIL CATEGORY: 2.1

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Scientific and Engineering Expenditures at Universities and Colleges
NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF-NIH Survey of Graduate Science Students and Postdoctorates
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:

- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

003669

WILEY-COLLEGE

Private Bachelor's-Granting

CARNEGIE COUNCIL CATEGORY: 3.2

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:

- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

003714

HAMPTON INSTITUTE

Private Master's-Granting

CARNEGIE COUNCIL CATEGORY: 2.1

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF-NIH Survey of Graduate Science Students and Postdoctorates
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:

- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

003765

NORFOLK STATE UNIVERSITY

Public Bachelor's-Granting

CARNEGIE COUNCIL CATEGORY: 2.1

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Scientific and Engineering Expenditures at Universities and Colleges
NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:
- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

003739

ST PAUL'S COLLEGE

Private Bachelor's-Granting

CARNEGIE COUNCIL CATEGORY: 3.2

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions

An alphabetic suffix may appear for certain individual data variables:
- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

003766

VIRGINIA UNION UNIVERSITY

Private Bachelor's-Granting

CARNEGIE COUNCIL CATEGORY: 3.2

Data for this institutional profile are based on the following survey data systems:

NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:

- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.

INSTITUTIONAL PROFILE

008841

COLLEGE OF THE VIRGIN ISLANDS

Public Bachelor's-Granting

CARNEGIE COUNCIL CATEGORY: 2.2

Data for this institutional profile e based on the following survey data systems:

NSF Survey of Scientific and Engineering Expenditures at Universities and Colleges
NSF Survey of Federal Support to Universities, Colleges and Selected Nonprofit Institutions
NSF Survey of Scientists and Engineers Employed at Universities and Colleges

An alphabetic suffix may appear for certain individual data variables:

- An "E" suffix indicates that the data were estimated by NSF or by the respondent.
- An "I" suffix indicates that the data were imputed by NSF's computer system.
- A "C" suffix indicates confidential data that cannot be released outside NSF.
- A dash (-) indicates that the data were not available.

The abbreviation "n.e.c." used with fields of science stands for "not elsewhere classified" and is frequently used for interdisciplinary programs.

On tables presenting personnel or Federal obligations data, sharp fluctuations may reflect shifts in organizational structure. For example, 1978 data for Johns Hopkins University include funding and personnel at the Applied Physics Laboratory, formerly considered a federally funded research and development center; conversely, data for Massachusetts Institute of Technology for 1974 and subsequent years exclude the Charles Stark Draper Laboratories, now an independent nonprofit institution.
